ASG and Village Council Celebrates the Nua and Seetaga Seawall Completion

"The Nua and Seetaga Seawall project has been a long time coming, and its completion marks a significant step towards safeguarding our coastal communities."

In a momentous event, Governor Lemanu P. S. Mauga and First Lady Ella, along with Lieutenant Governor Talauega and Speaker of the House Savali T. Ale joined cabinet members and the village council, to commemorate the dedication ceremony of the Nua and Seetaga Seawall on September 8, 2023. This significant milestone symbolizes a longstanding commitment to the welfare and resilience of our coastal communities. The ribbon cutting

ceremony was gracefully performed by First Lady Ella, signifying the official opening of the seawall.

Governor Lemanu expressed the profound significance of this project during his remarks. He recalled that the seeds of this initiative were sown during his tenure as Lieutenant Governor under former Governor Lolo Moliga. The completion of the Nua and Seetaga Seawall stands as a testament to the dedication and hard work of those who have long championed its cause. Governor Lemanu stated, “This day is not only a celebration of infrastructure but also monumental to the resilience and unity of our community. The Nua and Seetaga Seawall project has been a long time coming, and its completion marks a significant step towards safeguarding our coastal communities.”

The dedication ceremony was followed by a heartwarming celebratory feast hosted by the Nua and Seetaga village council. The American Samoa Government extends its warmest congratulations to all those involved in making the Nua and Seetaga Seawall project a reality.
